

APSiM3Plus

Integrated Web-server & Logger
and Gateway to NetID and MDAR

MONITOR

CONTROL

REPORT

- Monitor the status of Metal Detector network in real time from anywhere
- Remotely control and verify the security level across all of checkpoints instantly
- Report on number of people screened and alarm rates automatically
- Connect to CEIA NetID System for advanced network management features
- Optional zero configuration network for simple setup

APSiM3PLUS

Integrated web-server & logger and Gateway to NetID and MDAR

APSiM3Plus Advanced Power Supply and Interface Module

- Ethernet 100base-TX connection from bottom and ceiling
- 802.11 b/g Wi-Fi
- Bluetooth 2.1
- USB host and device interface
- RS-232 interface
- Zero Configuration Networking (Zeroconf)

The **APSiM3Plus** is an easy to install upgrade module that adds networking capability to Metal Detector. Centrally monitor one or more detectors to guarantee they are operational and are set to the appropriate security level for the current threat. Quickly adjust the security level as conditions change without notifying local staff or visiting every metal detector. Remotely control critical parameters and create detailed transit and alarm reports automatically.

The **APSiM3Plus** module allows you to interface to the NetID centralized Network Managements System as well as to the MDAR Metal Detector Alarm Recorder Software.
