The **HI-PE** is a high performance walk-through Multi-Zone Metal Detector which meets all International Security Standards.

A “height on person” display actually indicates, by means of illuminated LED’s, the position of the weapon on the person.

**ACCURATE DETECTION OF ALL METALLIC THREAT ITEMS**

- Capable of detecting a wide range of threat objects composed of magnetic, on-magnetic metals and mixed alloys
- Quick, accurate analysis of all parts of the body of people in transit, from the shoe level to the crossbar
- Cutting-edge discrimination technology allows personal effects to be ignored, creating rapid transit flow
- Superior CEIA reliability slashes total cost of ownership

The HI-PE is a high performance walk-through Multi-Zone Metal Detector which meets all International Security Standards. A “height on person” display actually indicates, by means of illuminated LED’s, the position of the weapon on the person.

The HI-PE allows a high level of discrimination between significant metal masses, such as the weapons which are to be detected, and personal metal effects.

The overall system is characterized by sturdy, reliable electronic and mechanical construction, and ease of installation.

**NEW CERTIFIED IP66 CONTROL UNIT**

- New integrated design
- Total compatibility with IP20 (plastic) and IP65 (stainless steel) control units
- Robust structure through the use of high-performance polymers for the construction of housing
- Waterproof / Dustproof: IP66 compliant (IEC 60529)
- Exceptional impact resistance at low and high temperatures and resistance to corrosion from atmospheric agents
- Display made with specific polymer to improve the visibility of the LEDs by increasing the definition and clarity

**EXCEPTIONAL IMMUNITY**

Exceptional immunity to environmental interferences makes the Metal Detector easy to use even when electrical noise is encountered.
