HI-PE Plus
ENHANCED WALK-THROUGH MULTI-ZONE METAL DETECTOR

KEY FEATURES

• Accurate Detection of all Metallic Threat Items
• High Discrimination and Throughput
• Exceptional Immunity to external interferences
• Compliant with and Certified to the Strictest Security Standards for weapons detection
• Unmatched Reliability
• Rapid Installation
• Panel Design

CERTIFIED BY GOVERNMENTAL LABORATORIES*

* Data available upon request

www.ceia.net
The **HI-PE Plus Multi-Zone Metal Detector** provides accurate detection of all metals, high level of discrimination of non-threat items, full compliance with the latest Security Standards and exceptional immunity to external interferences.

### ACCURATE DETECTION OF ALL METALLIC THREAT ITEMS

- Capability to detect the full range of metal weapon threats even within body cavities
- 60 localization zones: 20 vertical · 3 lateral
- Met-Identity technology for identification of Threat Composition

The most advanced Security Standards require detection of all ferrous and non-ferrous metal weapons and of those constructed in special non-magnetic alloys. The HI-PE Plus detects firearms and knives of this type, even when they are hidden within body cavities, and accurately indicate the position of the threat, its intensity and its prevalent composition. Inspection personnel thereby acquire thorough knowledge of the metal item and can act, according to procedures, with maximum effectiveness and security.

### MOST POWERFUL AND VERSATILE SECURITY FEATURES

- Up to 50 built-in Security Programs
  - Up to 30 International Standards
  - Up to 20 Customizable Levels

Setting the Security Levels could not be easier and more versatile than in the HI-PE Plus.

Users can choose directly from the known International Standards or request implementation of a Standard personalized to their own requirements. Users can also create their own program and save it in internal memory for later use.

- Chip Card system for fast, simple and secure parameter changes (i.e. alarm volume and tone, counter reading, etc., and security level selection)

One unique characteristic of the CEIA metal detectors is the chip-card system, which allows Security Management to set the Security Level quickly, reliably and without having to program the device in any way.

- Any security standard can be enhanced with selectable random alarm probability

---

CEIA reserves the right to make changes, at any moment and without notice, to the models (including programming), their accessories and options, to the prices and conditions of sale.
The HI-PE Plus has a very low nuisance alarm rate even at the strictest Security Standards requested today, and therefore allows high transit flow rates and the minimum need for intervention by inspection personnel.

**HIGH DISCRIMINATION AND THROUGHPUT**

- Cutting-edge discrimination technology allows personal effects to be ignored, creating rapid transit flow
- No need to remove items such as belts, coins, keys, jewelry, watches, wallets, etc.
- Better Discrimination = Shorter Lines and Less Staffing

The transit volume magnetic scanning system, invented by CEIA and applied since production of the first zonal Metal Detectors in 1986, allows state-of-the-art detection and discrimination results.

The HI-PE Plus has a very low nuisance alarm rate even at the strictest Security Standards requested today, and therefore allows high transit flow rates and the minimum need for intervention by inspection personnel.

**MET-IDENTITY TECHNOLOGY**

With Met-Identity technology, the HI-PE Plus allows you to know where, how much and what type of metal is being brought into the secure area.

**EXCEPTIONAL IMMUNITY TO EXTERNAL INTERFERENCES**

Exceptional immunity to environmental interferences makes the Metal Detector easy to use even when electrical noise is encountered.
NEW CERTIFIED IP66 CONTROL UNIT

- New integrated design
- Total compatibility with IP20 (plastic) and IP65 (stainless steel) control units
- Robust structure through the use of high-performance polymers for the construction of housing
- Waterproof / Dustproof: IP66 compliant (IEC 60529)
- Exceptional impact resistance at low and high temperatures and resistance to corrosion from atmospheric agents
- Display made with specific polymer to improve the visibility of the LEDs by increasing the definition and clarity

UNIQUE ALARM SIGNALLING

- High visibility of the control unit and the zone indication independent from the operator position and the installation environment
- Flexible Acoustic Alarm Signaling System:
  - 10 Continuous and Pulsed Tones
  - 34 Special Sounds
- 10 Alarm Volume Levels
- Very High Precision Transit Counter

Accurate signaling is essential for best operation and flow management. The detector provides the user with fully-programmable signaling. Both entry-points can indicate with a high level of accuracy, even simultaneously, the vertical and lateral areas of transit of the threats detected, and can also be configured as ‘traffic lights’ to control transits through the detector.

RAPID INSTALLATION

- One touch guided automatic installation (OTS)
  - Innovative function assisting the installation through an automatic step-by-step procedure
- Continuous self diagnostics assures monitored performance reliability
HI-PE PLUS - ENHANCED WALK-THROUGH MULTI-ZONE METAL DETECTOR

HI-PE PLUS/PZ MODEL CONFIGURATION

STANDARD CONFIGURATION

- Compliant with the strictest detection and discrimination standards for EMDs (Enhanced Metal Detectors)
- 4 display bars each programmable as zone indicators and/or pacing lights
- 60 localization zones (20 vertical x 3 lateral) with left, center and right indication
- Specific Shoe Alarm color indication
- Antivandalic and Antitampering IP66 control unit
- High precision transit counter (2-beam)
- Chip Card Reader
- BT, infrared and RS-232 communication
- Programmable Random Alarm capability
- 3-Level Password and hardware key access protection
- Met-identity technology [separate Ferrous and Non-Ferrous alarm signaling]
- One Touch Automatic Self Installation (OTS)
- Automatic Operational Functional Verification (OFV)
- Automatic Vibration Compensation (AVS, EVA)
- Automatic Channel Search (CS)
- Automatic Floor Gain Adjustment (FGA)
- Automatic Technical Functional Verification (TFV)
- Automatic Environmental Noise Compensation (ENA)
- Powered by safe low voltage DC
- Anti-tamper on/off switch

INTEGRATED WEB-SERVER & LOGGER

• Monitor the status of Metal Detector network in real time
• Centralized Setting of the Metal Detectors' working parameters
• Transits flow monitoring

• Report on number of people screened and alarm rates automatically
• Detailed reporting of the transits data and the Security Device configuration data

• Remotely control and verify the security level
• No server or specific client software required, only a web browser
• Zero configuration network for simple setup
• 2 x Ethernet 100base-TX

APSiM2 Plus, APSiM3 Plus

The APSiM2 Plus, APSiM3 Plus modules allow you to protect and manage your checkpoint better while saving labor hours in the process.

## SPECIFICATIONS

| **GATE STRUCTURE** | State-of-the-art, robust and washable panels  
Protected against aging, weather and wear |
|--------------------|---------------------------------------------|
| **OPERATIONAL FEATURES** | High discrimination and transit flow rates five or more times greater than other metal detection systems  
Quick reset time as short as 0.2 seconds for high throughput rate  
Very high detection speed (up to 15 m/sec.)  
Built-in operational functional verification  
One-touch key reading of inbound, outbound and Security Level Data |
| **QUALITY** | Continuous self diagnostic system  
Proven reliability  
No periodic re-calibration and preventive maintenance required  
No scheduled maintenance  
Fully digital design |
| **ALARM SIGNALLING** | Multi-zone display bar for “height on person” localization  
4 light bars with selectable entry/exit and pacing indication  
Green and red metering signals proportional to the mass of the detected target  
10 selectable continuous and pulsed tone plus 34 special tones  
10 selectable sound intensities ranging from 0 to 90 dbA at 1m |
| **TYPE OF SIGNALLING** | Fixed or proportional to the mass in transit - visible from 6m under lighting of 4000lux  
60 distinct zones (20 vertical x 3 lateral) entry and exit side |
| **PROGRAMMING** | Up to 50 built-in Security Programs  
Remote via Infrared Remote Control Unit, BT or Ethernet 10/100 base T (option) interface  
Security level: International Standard (IS) command / Chip card  
Local by Control Unit alphanumeric display and keyboard  
Programming and chip card access protected by user and super-user passwords |
| **ENVIRONMENTAL DATA** | Power Supply: 100…277V± ±10%, 47…63Hz, 40 VA typical consumption  
Operating temperature: -20°C to +65°C  
[-37°C to +70°C upon request]  
Storage temperature: -37°C to +70°C  
Relative humidity: 0 to 95% (without condensation) |
| **INSTALLATION DATA** | Automatic synchronisation between two or more metal detectors with distance of down to 5 cm without the use of external cables  
Automatic Installation function (OTS) |

### CERTIFICATION AND COMPLIANCE
- Compliant with and certified to the applicable Standards for Enhanced Metal Detectors (EMD)
- Compliant with the applicable electromagnetic Standards on Human Exposure and Pacemaker Safety
- Compliant with all Airport Security Standards worldwide
- Compliant with applicable International Standards for electrical safety and EMC

### APPLICATIONS
- Government Buildings
- Airports
- Industries (Security)
- Nuclear Facilities (Security)
- Prisons (Visitors)
- Public Events
- Amusement Parks
- Courts
- Data Processing Centers (EDP)
- Hotels
- Schools Security

### COMPREHENSIVE SUPPORT
CEIA provides full operational and technical training support by certified personnel either at CEIA facility or at customer site.
