**The PD240CB is a Hand Held Metal Detector** that combines high reliability and ergonomics with advanced detection and operator signaling features.

Long detection range for weapons and minimum metal targets, effective sensitivity to all alloys, exceeds the latest Security Standards and has high immunity to external metal masses.

### ADVANTAGES & BENEFITS

- Programmable Sensitivity
- Long Detection Range
- Extended Continuous Operation Time
- Automatic Low Power Mode during Screening Pauses
- Embedded Long Life Rechargeable Batteries are renewable energy and eliminate the Operation Cost of Alkaline Batteries
- Embedded Fast and Reliable Battery Charger: no need for removal of batteries
- Dedicated Docking Station acts as Table Stand and Mains connection for Battery Charge
- Operator Functions can be standard or customized by the user through PC GUI and USB connection

### ELEGANT, ROBUST AND ERGONOMIC

The **PD240CB** features a special ergonomic design consisting of an offset hand grip which ensures that the operator’s hand does not interfere with the sensitive detection area. Special care has gone into the mechanical design of the detector. Absence of sharp edges or corners allows the detector to be passed smoothly over the inspected area without getting caught in buttons, buckles, folds or other parts of clothing.

### ADVANCED CONTROL PANEL

The control panel with buttons and warning lights is made from high-thickness silicon guaranteeing a high degree of protection to make the **PD240CB** suitable for indoor and outdoor use.

### FULLY PROGRAMMABLE SIGNALING

- Proportional/Fixed, High Loudness **Acoustic Alarm**
- Proportional/Fixed, High Brightness **Optical Alarm**
- **Vibration Alarm** for Discrete Screening
  - 1 Power push button
  - 2 L low sensitivity
  - 3 M medium sensitivity
  - 4 H high sensitivity
  - 5 Battery charge indicator
  - 6 Acoustic alarm
  - 7 Vibration Alarm
  - 8 Visual alarm indicator

Optical indication proportional to the metal signal strength [Low, Medium, High].
**NIJ STANDARD 0602.02 COMPLIANT**

The technical features of the detector comply with the NIJ standard 0602.02 and the new NIJ draft standard 0602.03. The PD240CB has uniform sensitivity to magnetic and non-magnetic targets including those made of stainless steel. At the same time the detector offers excellent body-effect compensation and has high immunity to external disturbance from electromagnetic and mechanical sources.

**FULL DIGITAL DESIGN**

The PD240CB is fully digital. Electronic functions include an inspection field transmitter-receiver based on Digital Signal Processing (DSP) technology, a digital operator interface and external communications over the incorporated USB port.

**EXTENDED CONTINUOUS OPERATION TIME**

The PD240CB is powered by two AA-size NiMH batteries with a battery life of over 50 hours. A Low Power Mode is automatically activated during periods of inactivity, extending the battery life up to 100 hours. An internal circuit optimizes battery recharging which takes less than five hours.

**SOPHISTICATED COMMUNICATION CAPABILITIES**

The digital design of the new metal detector also enables the maximum flexibility in selecting how detection alarms are signalled. Users can keep the factory settings or connect the detector over its USB to a PC and then personalize the settings with a dedicated graphic interface.

**HIGH IMMUNITY TO ENVIRONMENTAL INTERFERENCES**

The PD240CB incorporates innovative technical solutions which make it possible to operate much closer to floors with steel reinforcement bars than was previously possible with conventional hand-held detectors. All this without any reduction in sensitivity.

Dual-Tone Pinpointing for high precision metal objects localization.
